

CLAIMS**WHAT IS CLAIMED IS:**

1. A temperature controlled environment comprising:

5 at least one garment for covering a wearer's head and body; and

at least one heating means, wherein said at least one garment completely encloses said at least one heating means.

10 2. The temperature controlled environment of claim 1, wherein said heating means is a non-asphyxiating heating means.

15 3. The temperature controlled environment of claim 1, further comprising means for seating, wherein said at least one garment at least partially encloses said means for sitting on.

20 4. The temperature controlled environment of claim 1, wherein said garment comprises:

at least one head portion;

at least one torso portion having front wall and back wall;

at least one arm portion; and

at least one base portion having a front wall, side walls
and back wall.

5 5. The temperature controlled environment of claim 4,
further comprising at least one zippered-entry frontally
disposed on said at least one torso portion and said at least
one base portion.

10 6. The temperature controlled environment of claim 4,
wherein said at least one torso portion has at least one
opening formed therein for hand insertion.

15 7. The temperature controlled environment of claim 4,
wherein said at least one torso portion has at least one
opening formed therein for extention of a support cable
therethrough.

20 8. The temperature controlled environment of claim 4,
wherein said at least one head portion at least partially
covers the head of a wearer, and wherein said at least one
head portion further includes at least one eye opening.

9. The temperature controlled environment of claim 2,
wherein said non-asphyxiating heating means is a catalytic
heater.

5 10. The temperature controlled environment of claim 3,
wherein said seating means comprises a chair.

11. The temperature controlled environment of claim 10,
wherein said chair is collapsible.

10

12. The temperature controlled environment of claim 4,
wherein said at least one torso portion and said at least one
base portion each comprise at least one zipper extending
across said at least one torso portion back wall and said at
15 least one base portion back wall, and wherein said at least
one zipper extends from approximately the middle of said at
least one torso portion to approximately the bottom of said at
least one base portion, whereby said temperature control
environment can be secured around a fixed object.

20

13. The temperature controlled environment of claim 12,
further comprising at least one snap flap for covering said at
least one zipper, whereby a heat-tight environment is created.

14. The temperature controlled environment of claim 5, wherein said at least one zippered-entry further comprises at least one snap flap to cover said at least one zippered-entry, whereby a heat-tight environment is created.

5

15. The temperature controlled environment of claim 1, wherein said garment further comprises at least one securing grommet.

10 16. The temperature controlled environment of claim 1, further comprising means for securing said temperature controlled environment around a stationary object.

15 17. The temperature controlled environment of claim 1, further comprising means for tethering, whereby said temperature control environment may be tethered to an object, and whereby said temperature control environment is prevented from a reduction of altitude by said means for tethering.

20 18. A method for creating a warm environment comprising the steps of:

- a. providing an outer shell garment;
- b. providing means for heating; and

c. providing an entryway, wherein a user may at least partially enclose himself in said warm environment.

19. The method for creating a warm environment of claim
5 18, wherein said heating means is a non-asphyxiating heating
means.

20. A hunting blind comprising:
10 floor;
at least one shell overgarment;
means for sitting; and
means for heating, said heating means being non-
asphyxiating.

15
